

What is Chapperone?

Chapperone is an app that makes taking students on trips safer and easier. It's a logistics and communication app that schools, student travel companies and youth groups use to share trip information and communicate securely with students.

And who are we?

Chapperone is a small company founded by two teachers. We created Chapperone as we know how much of a logistical nightmare it is to take students out of the classroom, and we also know how important and beneficial it is for kids to get out of the classroom and into the real world. We designed Chapperone as a way to encourage more school trips and to make them safer.

What data will be collected from my child?

To sign up to Chapperone, students will need to download the app for free and then create an account. To create an account they will need to share their name, a username and their email address. We strongly recommend students use their school emails if this is available.

Chapperone uses the highest levels of security and confidentiality to ensure this information remains safe. We do not collect any additional information and we *never* sell or use the student information in ways other than for the app functionality we have detailed above.

We're parents ourselves and student safety, both physical and technical, is our utmost priority.

For more information about Chapperone, please visit our website www.gochapperone.com where you can see all about our products and services, as well as reading our Privacy Policy and Terms of Service. If you have any questions or concerns, please reach out via our website.
